Title: Privacy Policy agreement isn't showing on IOS

Severity: **High**

Description: When first downloading the application, the user does not receive a pop-up to accept Privacy Policy.

Steps:

1. Search for DuoCo Strip on App Store.
2. Download the app.
3. Open the app.

Expected result: when first opening the app a pop-up will be opened asking the user to accept the Privacy Policy or deny and exit the app.

Actual result: When first opening the app the user doesn't receive a pop-up and can use the app without any issues.

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max

Title: The app can be used without Bluetooth permissions

Severity: **Medium**

Description: When opening the application without allowing Bluetooth connection, the user can keep using the application without a connection to Bluetooth but isn't receiving a notification that the app is not connected to the LED strips

Steps:

1. Search for DuoCo Strip on App Store.
2. Download the app.
3. Open the app.
4. Deny Bluetooth connection permissions.

Expected result: The user will receive a notification saying they cannot use the app without allowing Bluetooth connection.

Actual result: The user doesn't receive a notification and can use the app freely without being told that nothing will change in the LED strips.

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max

Title: Spelling Error the “Style” tab

Severity: low

Description: In the “Style” tab there is a spelling mistake with one of the presets.

Steps:

1. Open the app.
2. Click on Style in the low part of the screen.
3. Scroll down in the presets to “Seven color Stobe Flash.”

Expected result: The name of the preset is “Seven Color Strobe Flash.”

Actual result: The is of the preset is “Seven color Stobe Flash”: missing a high case letter in “color” and a spelling mistake in “Stobe” instead of “Strobe”

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max

Title: Schedule doesn't work when app isn't running in background

Severity: **Medium**

Description: The schedule feature doesn't work when the app doesn't run in the background

Steps:

1. Open the app.
2. Click on schedule.
3. Create a schedule on for 5 minutes from the current time.
4. Kill the app.

Expected result: The app doesn't need to run in the background and the light will turn on in 5 minutes.

Actual result: The app needs to run in the background and the LED lights didn't turn on.

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max

Title: Shake feature works when turned off

Severity: low

Description: When turning off the shake feature and going back to the main page (adjust tab) it works like it's turned on

Steps:

1. Open the app.
2. Open settings.
3. Verify Shake is off.
4. Go to the "adjust" tab.
5. Shake the phone.

Expected result: Nothing will happen because the feature is turned off

Actual result: The app acts like the feature is turned on, shaking sends a vibration to the phone and randomly changes the LED's color

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max

Improvement suggestions

By: Avihai Shomrat

Title: Limit character amount in “Group Manage”

Severity: **low**

Description: When entering more than 50 characters the sentence become small looking is doesn't look visibly well

Steps:

1. Open the app.
2. Swipe left to open Group Manage
3. Create a new group with 50 characters or more the sentence will stay visibly good.

Expected result: when creating a group with 50 characters or more the sentence will stay visibly good.

Actual result: When entering more than 50 characters the sentence's font becomes smaller and is hard to read.

Notes: tested on IOS 17.1.2, iPhone 11 Pro Max
