Main STDs

By: Avihai Shomrat, Ariel Dotan, Gitit Cohen and Yiftach Rosenfeld

Test Description:

Testing the Connection Status feature.

Test Purpose: Testing the Connection Status feature to see if it works as intended.	
Test Run Instructions: Have an internet connection	
Test Run Information: **Tester Name:** Avihai Shomrat **Date of Test:** 12/11/2023	**Prerequisites for this test: access to an active Gmail Account with the Connection Status feature available**
	Software Versions: N/A Application: Gmail Browser: Chrome Operating System: Windows 10
	Required Configuration: [browser setup, security, or user ID roles] No special setup is needed
NOTES and RESULTS:	

	TEST SCRIPT STEPS/RESULTS			
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/ FAIL
sanity- Functional - **connection status - automatic**				
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened.	PASS
2.	Log in to a valid Gmail account, avihaishomrat@gmail.com.	The website logs in to avihaishomrat@gmail.com.	Website logged in the user to avihaishomrat@gmail.com.	PASS
3.	Click on connection status button at the top left part of the screen.	Connection status menu opens.	Connection status menu opened.	PASS
4.	Click on Automatic.	Connection status changes to Automatic, and the bubble becomes green.	Connection status changed to Automatic, and the bubble became green.	PASS

	TEST SCRIPT STEPS/RESULTS			
STEP	**TEST STEP/INPUT**	**EXPECTED RESULTS**	**ACTUAL RESULTS**	**PASS/ FAIL**
5.	Wait 10 minutes and check if the status changed to away.	The status connection changes to away after 10 minutes.	The Status connection changed to away after 10 minutes.	PASS
6.	Log in to a different valid email, Avgiosyiar@gmail.com.	The website logs in to Avgiosyiar@gmail.com.	Website logged in the user to Avgiosyiar@gmail.com.	PASS
7.	Open a chat with avihaishomrat@gmail.com.	The page will open a chat with avihaishomrat@gmail.com.	The page opened a page with avihaishomrat@gmail.com	PASS
8.	Check if avihaishomrat@gmail.com bubble is invisible.	The bubble is supposed to be invisible since avihaishomrat@gmail.com is away.	The bubble is invisible since avihaishomrat@gmail.com is away.	PASS
9.	Make an activity with avihaishomrat@gmail.com.	The bubble should turn green again.	The bubble turned green again.	PASS
10.	Open Avgiosyiar@gmail.com and check chat with avihaishomrat@gmail.com to see the bubble.	The bubble should turn green since avihaishomrat@gmail.com is active.	The bubble turned green since avihaishomrat@gmail.com is active	PASS
11.	Send a message to avihaishomrat@gmail.com.	The message will be sent to avihaishomrat@gmail.com, and he will be notified	the message was sent to avihaishomrat@gmail.com, and he was notified	PASS
	Sanity- Error handling - **connection status - automatic**			
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened	PASS
2.	Log in to a valid Gmail account. avihaishomrat@gmail.com	Website logs in to avihaishomrat@gmail.com	Website logged in the user to avihaishomrat@gmail.com	PASS
3.	**Turn off internet connection**			
4.	Click on connection status button at the top left part of the screen	Connection status menu will not open, and write offline	Connection status menu does not open, and wrote offline	PASS
5.	**Turn on internet connection**			
6.	Click on connection status button at the top left part of the screen	Connection status menu opens	Connection status menu opened.	PASS
	Sanity- GUI - **connection status - automatic**			
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened	PASS
2.	Log in to a valid Gmail account. avihaishomrat@gmail.com	Website logs in to avihaishomrat@gmail.com	Website logged in the user to avihaishomrat@gmail.com	PASS
3.	Change zoom to 50%.	According to the SRS, the website will change the zoom, and all visuals will remain accurate.	According to the SRS, the website changed, and all visuals remained accurate.	PASS.

| \multicolumn{5}{c}{TEST SCRIPT STEPS/RESULTS} |
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/ FAIL
4.	Change zoom to 300%.	According to the SRS, the website will change the zoom, and all visuals will remain accurate.	The website cuts, and when clicking the connection status button, the user cannot see the description of each button.	FAIL
5.	Click on connection status button at the top left part of the screen. The	button is clickable, and Connection status menu opens.	Connection status menu opened	PASS
6.	Click on Automatic.	The small bubble color changes to green when active and invisible when away.	The small bubble color changed to green when active and invisible when away.	PASS
\multicolumn{5}{c}{sanity- Functional - **connection status - Do not disturb**}
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened	PASS
2.	Log in to a valid Gmail account. avihaishomrat@gmail.com	Website logs in to avihaishomrat@gmail.com	Website logged in the user to avihaishomrat@gmail.com	PASS
3.	Click on connection status button at the top left part of the screen	Connection status menu opens	Connection status menu opened	PASS
4.	Click on Do not disturb.	Connection status changes to Do not disturb, and the bubble becomes red.	Connection status changed to Do not disturb, and the bubble became red	PASS
5.	Log in to a different valid email Avgiosyiar@gmail.com	Website login to Avgiosyiar@gmail.com	Website logged in the user to Avgiosyiar@gmail.com	PASS
6.	Open chat with avihaishomrat@gmail.com.	the page will open a chat with avihaishomrat@gmail.com	the page opened a page with avihaishomrat@gmail.com.	PASS
7.	Check if avihaishomrat@gmail.com's bubble is Red.	The bubble is supposed to be red since avihaishomrat@gmail.com is on Do Not Disturb.	The bubble is red since avihaishomrat@gmail.com is on Do Not Disturb.	PASS
8.	Send a message to avihaishomrat@gmail.com.	the message will be sent, but avihaishomrat@gmail.com will not be notified.	the message was sent, but avihaishomrat@gmail.com was not notified.	PASS
\multicolumn{5}{c}{sanity- GUI - **connection status - Do not disturb**}
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened	PASS

27.	Enter invalid day "32"	The page will not allow the user to enter the invalid date "32" and will show an error message "Please enter a valid date"	The page did not allow the user to enter the invalid date "32" and showed an error message "Please enter a valid date"	PASS
		Sanity- GUI - **Contacts**		
1.	Enter Gmail's main page	The website will load and enter the main page.	The website loaded and entered the main page	PASS
2.	Verify the Contacts button is in the right toolbar, and is not overlapping with other elements	The Contact's button is in the right toolbar and is not overlapping with other elements	the Contact's button was in the right toolbar and was not overlapping with other elements	PASS
3.	Verify there are no spelling errors on the contacts page and all the fonts are matching.	there are no spelling errors on the contacts page, it is user-friendly, and all the fonts are matching	there were no spelling errors on the contacts page, it is user-friendly, and all the fonts were matching	PASS
4.	Verify the search button is in the top right corner of the screen	The search button is in the top right corner of the screen and when hovered gets a soft grey background color	The search button was in the top right corner of the screen and when hovered got a soft grey background color	PASS
5.	Verify the create contact button is at the top of the screen, and has the + icon next to it	The create contact button is at the top of the screen, has the + icon next to it and when hovered gets a soft blue background color	The create contact button was at the top of the screen, and had the + icon next to it and when hovered got a soft blue background color	PASS
6.	In the Create contact page, verify there are no spelling errors	There are no spelling errors, and the website appears in a user-friendly menu	There were no spelling errors, and the website appeared in a user-friendly menu	PASS
7.	Verify the Save button appears in grey no fields are filled and when filed changes to blue	the Save button appears in grey no fields are filled and when filed changes to blue	the Save button appeared in grey no fields are filled and when filed changed to blue	PASS
8.	Create 3 different contacts			PASS
9.	Verify the contacts list sorts from a - z and when hovering over a contact its background color changes to soft blue	The contact list is user-friendly, sorts from a-z, and when hovering over a contact its background color changes to soft blue.	The contact list was user-friendly, sorted from a-z, and when hovering over a contact its background color changed to soft blue.	PASS

Test Description:

In this test, we are going to test the Offline section in settings

Test Purpose: Testing whether the offline feature works as intended

Test Run Information: **Tester Name:** Avihai Shomrat **Date of Test:** 21/11/2023	Prerequisites for this test: Have internet connection Have a web browser Have access to Gmail address avihaishomrat@gmail.com
	Software Versions: N/A Application: Gmail website Browser: Chrome Operating System: Windows 10
	Required Configuration: [browser setup, security, or user ID roles] No special setup is needed

NOTES and RESULTS:

	TEST SCRIPT STEPS/RESULTS			
STEP	**TEST STEP/INPUT**	**EXPECTED RESULTS**	**ACTUAL RESULTS**	**PASS/FAIL**
	Sanity- Functional - **Offline**			
1.	Navigate to https://www.gmail.com.	The website's login page opens.	The website's login page opened	PASS
2.	Log in to a valid Gmail account avihaishomrat@gmail.com	Website logs in to avihaishomrat@gmail.com	Website logged in the user to avihaishomrat@gmail.com	PASS
3.	Click on settings at the top of the screen	Button is clickable and opens a small settings menu	Button was clickable and opened a small settings menu	PASS
4.	Click on "See all settings"	the button is clickable and will open a full settings page where the user can change their settings	the button was clickable and opend a full settings page where the user can change their settings	PASS
5.	Click on "Offline"	Button is clickable and when clicked changes the menu to the offline settings	Button was clickable and when clicked changed the menu to the offline settings	PASS
6.	Check "Enable offline mail"	checking "Enable offline mail" will open more settings the user can change depending of their needs	Checking"Enable offline mail" opened more settings the user can change depending of their needs	PASS
7.	Click on the "Store emails from the last" option	Clicking on the "Store emails from the last" option will open a small pop-up letting the user change the days between 7, 30 and 90	Clicking on the "Store emails from the last" option opened a small pop-up letting the user change the days between 7, 30 and 90	PASS

	TEST SCRIPT STEPS/RESULTS			
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/FAIL
8.	Change the option to "90"	Clicking on 90 close the pop-up and show the user the selected days amount in the field	Clicking on 90 closed the pop-up and showed the user the selected days amount in the field	
9.	Change the option to "30"	Clicking on 30 close the pop-up and show the user the selected days amount in the field	Clicking on 30 closed the pop-up and showed the user the selected days amount in the field	PASS
10.	Change the option to "7"	Clicking on 7 close the pop-up and show the user the selected days amount in the field	Clicking on 7 closed the pop-up and showed the user the selected days amount in the field	PASS
11.	Check "download attachments"	Checking download attachments will download the attachments in the emails after saving the changes	Checking download attachments downloaded the attachments in the emails after saving the changes	PASS
12.	in Security, Check "Keep offline data on my computer"	Checking "Keep offline data on my computer" will keep all offline data on the user's computer when logging out of the account	Checking "Keep offline data on my computer" keeped all offline data on the user's computer when logging out of the account	PASS
13.	Click on Save changes	Clicking on Save changes show the user a warning screen telling the user that "Offline not recommended for shared devices" with the option to cancel or accept and continue	Clicking on Save changes showed the user a warning screen telling the user that "Offline not recommended for shared devices" with the option to cancel or accept and continue	PASS
14.	Click on Cancel	button is clickable and when clicked close the warning pop-up and redirect the user back to offline settings	button is clickable and when clicked closed the warning pop-up and redirect the user back to offline settings	PASS
15.	Click on Save changes	Clicking on Save changes show the user a warning screen telling the user that "Offline not recommended for shared devices" with the option to cancel or accept and continue	Clicking on Save changes showed the user a warning screen telling the user that "Offline not recommended for shared devices" with the option to cancel or accept and continue	PASS
16.	Click on "Got it"	Clicking on "Got it" will refresh the page and download all the mails from the last 7 days	Clicking on "Got it" will refreshed the page and download all the mails from the last 7 days	PASS
17.	Turn off internet connection			PASS
18.	Refresh the page	Refrshing the page will work even when offline because the user has download the data. but the user will be told that some functions are unavailable when offline	Refrshing the page worked even when offline because the user downloaded the data. but the user was told that some functions are unavailable when offline	PASS
19.	Enter an email with an attachment	entering an email is possible, and seeings the attachment will be successful because of the downloaded data	entering an email was possible, and seeings the attachment was successful because of the downloaded data	PASS

	TEST SCRIPT STEPS/RESULTS			
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/FAIL
20.	Turn on internet connection			PASS
21.	Click on settings at the top of the screen	Button is clickable and opens a small settings menu	Button was clickable and opened a small settings menu	PASS
21.	Click on "See all settings"	the button is clickable and will open a full settings page where the user can change their settings	the button was clickable and opend a full settings page where the user can change their settings	PASS
22.	Click on "Offline"	Button is clickable and when clicked changes the menu to the offline settings	Button was clickable and when clicked changed the menu to the offline settings	PASS
23.	Uncheck "Enable offline mail"	Unchecking "Enable offline mail" will close the options the user has for changing offline settings	Unchecking "Enable offline mail" closed the options the user has for changing offline settings	PASS
24.	Click on Save changes	Clicking on Save changes will refresh the page and disable offline	Clicking on Save changes refreshed the page and disable offline	PASS
25.	Go back to offline settings			PASS
26.	Check "Enable offline mail"	checking "Enable offline mail" will open more settings the user can change depending of their needs	Checking"Enable offline mail" opened more settings the user can change depending of their needs	PASS
27.	Click on the "Store emails from the last" option	Clicking on the "Store emails from the last" option will open a small pop-up letting the user change the days between 7, 30 and 90	Clicking on the "Store emails from the last" option opened a small pop-up letting the user change the days between 7, 30 and 90	PASS
28.	Change the option to "7"	Clicking on 7 close the pop-up and show the user the selected days amount in the field	Clicking on 7 closed the pop-up and showed the user the selected days amount in the field	PASS
29.	keep "Download attachments" Unchecked	Keeping Download attachments unchecked will not download attachments when activating offline mail	Keeping Download attachments unchecked didn't download attachments when activating offline mail	PASS
30.	in Security, Check "Keep offline data on my computer"	Checking "Keep offline data on my computer" will keep all offline data on the user's computer when logging out of the account	Checking "Keep offline data on my computer" keeped all offline data on the user's computer when logging out of the account	PASS
31.	Click on "Got it"	Clicking on "Got it" will refresh the page and download all the mails from the last 7 days	Clicking on "Got it" will refreshed the page and download all the mails from the last 7 days	PASS
32.	Turn off internet connection			PASS
33.	Enter an email with an attachment	The email will be available, but the attachment inside the mail will not be due to unchecking "download attachments"	The email was available, but the attachment inside the mail was not be due to unchecking "download attachments"	PASS
34.	Turn on internet connection			PASS
35.	Click on settings at the top of the screen	Button is clickable and opens a small settings menu	Button was clickable and opened a small settings menu	PASS

1. Test Description:
Sanity testing

Test Purpose: Sanity testing for feature "compose"

Test Run Instructions:

Test Run Information:	Prerequisites for tit's test:
Tester Name: Gitit Cohen **Date of Test:** 9/11/2023	Internet connection Web browser Access to gmail account **gititcohen@gmail.com** Access to gmail account **Avgiosyiar@gmail.com**
	Software Versions: Application: Gmail Browser: Chrome Operating System: Windows 11
	Required Configuration:

NOTES and RESULTS:

TEST SCRIPT STEPS/RESULTS				
STE P	**TEST STEP/INPUT**	**EXPECTED RESULTS**	**ACTUAL RESULTS**	**PASS/ FAIL**
1.1 sanity functionality compose recipient				
1.	Navigate to https://www.gmail.com	The browser redirects the user to the login page	The browser redirected the user to the login page	PASS
2.	Sign in to Gmail account: gititcohen@gmail.com	Gititcohen@Gmail account home screen will be presented	Gititcohen@Gmail account home screen will be presented	PASS

	TEST SCRIPT STEPS/RESULTS			
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/FAIL
3.	Click "compose" on the top left side of the screen	A new empty message window will open	A new empty message window opened	PASS
4.	Enter a message "hi" to the message box	The message "hi" is written in the box	"Hi" is written in the box	PASS
1.2 sanity functionality compose recipient				
1.	Click "compose" on the top left side of the screen	A new empty message window will open	A new empty message window opened	PASS
2.	Start typing a recipient address:Avgiosyiar@gmail.com	A pop up box with all the contact starting with an A will appear	A pop up box with all the contact starting with an A appears	PASS
3.	Select the email address you need: Avgiosyiar@gmail.com	The email address Avgiosyiar@gmail.com will be picked	The email address Avgiosyiar@gmail.com is picked	PASS
4.	Add a new recipient by clicking the CC option on the right side of the recipient box	A new recipient row appears	A new recipient row appears	PASS
5.	Start typing a new recipient address: gititcohen@gmail.com	A pop up box with all the contact starting with an G will appear	A pop up box with all the contact starting with an G appears	PASS
6.	Select the email address you need: gititcohen@gmail.com	The email address gititcohen@gmail.com will be picked	The email address gititcohen@gmail.com is picked	PASS
7.	Add a new recipient by clicking the Bcc option on the right side of the recipient box	A new recipient row appears	A new recipient row appears	PASS
8.	Start typing a new recipient address: gititcohen@gmail.com	A pop up box with all the contact starting with an G will appear	A pop up box with all the contact starting with an G appears	PASS
9.	Select the email address you need: gititcohen@gmail.com	The email address gititcohen@gmail.com will be picked	The email address gititcohen@gmail.com is picked	PASS
10.	Click "compose" on the top left side of the screen	A new empty message window will open	A new empty message window opened	PASS

STEP	TEST SCRIPT STEPS/RESULTS			
STE P	**TEST STEP/INPUT**	**EXPECTED RESULTS**	**ACTUAL RESULTS**	**PASS/ FAIL**
11.	Start typing a recipient address:Avgiosyiar@gmail.com	A pop up box with all the contact starting with an A will appear	A pop up box with all the contact starting with an A appears	PASS
1.3 sanity ERROR HANDLING - negative compose recipient				
1.	Click "compose" on the top left side of the screen	A new empty message window will open	A new empty message window opened	PASS
2.	Enter an invalid Email address: hfykd)(\\\@jkiol.com	Gmail won't acknowledge the address hfykd)(\\\@jkiol.com as a legal address	Gmail doesn't acknowledge the address hfykd)(\\\@jkiol.com	PASS
3.	Copy a list of Email address with duplicate address to the recipient box	The list will be copied	The list is copied	PASS
4.	Copy the list to the recipient box	The list will be copied without the duplicated address	The list is copied without duplicated address	PASS
5.	Copy the same list to the recipient box	the list won't appear twice	the list doesn't appear twice	PASS
6.	Minimize the recipient box by clicking on the subject box	The recipient row minimizes and shows how many contacts were added	The recipient row minimized and show how many contacts were added	PASS
7.	Try to send a mail without a recipient	An error pop up will appear "Please specify at least one recipient."	An error pop up appears "Please specify at least one recipient."	PASS
1.4 sanity GUI - feature recipient				
1.	Click "compose" on the top left side of the screen	A new empty message window will open and user friendly interface will display proper	A new empty message window opened and user friendly interface is displaying proper	PASS
2.	Start typing a recipient address:Avgiosyiar@gmail.com	A pop up box with all the contact starting with an A will appear	A pop up box with all the contact starting with an A appears	PASS

	TEST SCRIPT STEPS/RESULTS				
STEP	TEST STEP/INPUT	EXPECTED RESULTS	ACTUAL RESULTS	PASS/FAIL	
3.	Select the email address you need: Avgiosyiar@gmail.com	The email address Avgiosyiar@gmail.com will display clearly and will be picked and be shown as a clickable contact	The email address Avgiosyiar@gmail.com was picked and is shown clearly and as a clickable contact	PASS	
4.	Start typing a recipient address:gititcohen@gmail.com	A pop up box with all the contact starting with an A will appear	A pop up box with all the contact starting with an A appears	PASS	
5.	Select the email address you need: gititcohen@gmail.com	The email address gititcohen@gmail.com will be picked and be shown as a clickable contact in a different color than Avgiosyiar@gmail.com	The email address gititcohen@gmail.com is picked and is shown as a clickable contact in a different color than Avgiosyiar@gmail.com	PASS	
6.	Hover on the contact gititcohen@gmail.com	The contact box of gititcohen@gmail.com will change from white to gray	The contact box of gititcohen@gmail.com is changed from white to gray	PASS	
7.	Hover on the contact gititcohen@gmail.com	A contact card will pop up	A contact card is pop up	PASS	
1.5 sanity functionality compose - subject					
1.	Click "compose" on the top left side of the screen	A new empty message window will open	A new empty message window opened	PASS	
2.	Enter a subject name to the message: Hello"	The subject line will show the word "Hello"	The Word Hello is written and shown in the subject line	PASS

1. Sanity test- General Settings - Usability test				
10	Check that complicated buttons have an explanation for its use.	All the complicated buttons will have an explanation for its use.	All complicated buttons have an explanation for its use.	Pass
11	Check that the elements are bold when you hover or click on them.	The elements will be bold when the mouse hover or click on them.	The elements were bold when the mouse hover or clicked on them.	Pass

Test Description:

Testing Gmail

Test Purpose: Test of the function "Chat" in Gmail.

Test Run Instructions:

Test Run Information:	Prerequisites for this test:
	yiftach442@gmail.com
	Avgiosyiar@gmail.com
	yiftachrosenfeld@gmail.com
Tester Name: Yiftach Rosenfeld	
Date of Test: 12.11.23	**Software Versions:**
	Browser: Chrome 116.0.5845.188
	Operating System: Windows 11 Home
	Required Configuration:

NOTES and RESULTS:

- chat's features that are not included in the test: chat's notifications, pin chat, leave a chat, tasks, active threads, delete history.

- 1 GUI bug found- In the bug's page.

	TEST SCRIPT STEPS/RESULTS			
	Sanity test - Functionally test – Chat function			
STEP	**TEST STEP/INPUT**	**EXPECTED RESULTS**	**ACTUAL RESULTS**	**PASS/ FAIL**
1.	**Chat Function – Sanity test**			
2.	Navigate to https://www.Gmail.com	The website is reachable and will open.	The website is reachable and has opened.	Pass
3.	Login with yiftach442@gmail.com to Gmail.	The login to yiftach442@gmail.com will succeed.	The login success to yiftach442@gmail.com .	Pass
